Welcome to ALCHIMIA's first newsletter | April 2023

Dear ALCHIMIA community,

We are very excited to release our introductory newsletter! Within this newsletter, readers will easily be able to locate:

- A comprehensive introduction to the ALCHIMIA project.
- Exclusive interview with the ALCHIMIA coordinator.
- Our blog posts about 'The benefits of Federated Learning for the European steel industry' and 'Human factor analysis in the ALCHIMIA project

The ALCHIMIA project is dedicated to promoting sustainable metalworking in the EU, and we are committed to continuing our work towards this goal. We invite you to stay tuned for updates on our progress and to follow us on social media to stay up-to-date with the latest news and developments. By working together, we believe we can make a significant difference in creating a more sustainable future for the metalworking industry.

Thank you for your support and interest in the ALCHIMIA project!

ALCHIMIA in a nutshell

The ALCHIMIA Project (Grant Agreement – n° 101070046) is specialised in the digitalisation of EU metallurgy industries to unlock the full potential of artificial intelligence and support the green transition. The main mission of the ALCHIMIA project is to provide the comprehensive and effective metalworking industries in the EU with a platform to support the transition to high-quality, competitive, efficient, and green production processes with the guarantee of high quality products in the steelmaking industry.

ALCHIMIA aims to develop a cutting-edge system that substantially automates and optimizes the production process with a holistic approach that supports a green economy for the steel industry and protects the environment. In order to create a competitive and environmentally friendly European metallurgical industry, the ALCHIMIA Project aims to reduce energy consumption, emissions, and waste management in the steel-making process.
